

Feedback — Week 8 Quiz

[Help Center](#)

You submitted this quiz on **Thu 12 Mar 2015 11:50 AM PDT**. You got a score of **12.00** out of **12.00**.

Question 1

When registering a Listener for SensorEvents, you can set the rate at which the Sensor returns its readings. Which of the following Sensor constants represents to the most frequent rate? See: <http://developer.android.com/reference/android/hardware/SensorManager.html> for more information.

Your Answer	Score	Explanation
<input type="radio"/> SENSOR_DELAY_NORMAL.		
<input type="radio"/> SENSOR_DELAY_UI.		
<input type="radio"/> SENSOR_DELAY_GAME.		
<input checked="" type="radio"/> SENSOR_DELAY_FASTEST.	✓ 1.00	
Total	1.00 / 1.00	

Question 2

SensorEvents have which of the following fields? See:

<http://developer.android.com/reference/android/hardware/SensorEvent.html> for more documentation.

Your Answer	Score	Explanation
<input checked="" type="checkbox"/> A sensor identifier.	✓ 0.25	
<input checked="" type="checkbox"/> A timestamp.	✓ 0.25	

<input checked="" type="checkbox"/> A measurement accuracy.	✓	0.25
<input checked="" type="checkbox"/> Sensor-specific measurement values.	✓	0.25
Total	1.00 / 1.00	

Question 3

(True or False) High-pass filters are used when you want to emphasize the transient changes in a Sensor's readings, while deemphasizing the constant portions of the reading?

Your Answer	Score	Explanation
<input checked="" type="radio"/> True.	✓ 1.00	
<input type="radio"/> False.		
Total	1.00 / 1.00	

Question 4

Which of the following Sensor types did the SensorCompass application use?

Your Answer	Score	Explanation
<input type="checkbox"/> TYPE_PRESSURE.	✓ 0.25	
<input type="checkbox"/> TYPE_LINEAR_ACCELERATION.	✓ 0.25	
<input checked="" type="checkbox"/> TYPE_MAGNETIC_FIELD.	✓ 0.25	
<input checked="" type="checkbox"/> TYPE_ACCELEROMETER.	✓ 0.25	
Total	1.00 / 1.00	

Question 5

Which type of LocationProvider gets its readings from Global Positioning System satellites?

Your Answer	Score	Explanation
<input type="radio"/> PASSIVE_PROVIDER.		
<input checked="" type="radio"/> GPS_PROVIDER.	✓ 1.00	
<input type="radio"/> NETWORK_PROVIDER.		
Total	1.00 / 1.00	

Question 6

Recently Android added an improved API for acquiring Location information via Google Play Services. I have created a new version of the LocationGetLocation application called LocationGetLocationServices. This application is in the source code repository for the class. Which LocationClient method is used in this new application to acquire the last known location reading?

You entered:

getLastLocation

Your Answer	Score	Explanation
getLastLocation	✓ 1.00	
Total	1.00 / 1.00	

Question 7

Which class and method did the MapEarthQuakeMap application use in order to create a marker pin for each earthquake? Give your answer in the form "ClassName.MethodName".

You entered:

GoogleMap.addMarker

Your Answer		Score	Explanation
GoogleMap.addMarker	✓	1.00	
Total		1.00 / 1.00	

Question 8

With the Google Maps Android API, you can change a map's zoom level by calling methods of the CameraUpdate class, such as zoomTo(float). At what zoom level would the width of the earth be roughly 1024dp? See: <https://developers.google.com/maps/documentation/android/views#zoom> for more documentation.

Your Answer		Score	Explanation
<input type="radio"/> 8			
<input type="radio"/> 0			
<input checked="" type="radio"/> 2	✓	1.00	
<input type="radio"/> 4			
Total		1.00 / 1.00	

Question 9

In the DataManagementPreferenceFragment application, Android invokes a method when the user changes the username preference. The code in this method then updates the display with the new username. What method does Android call?

You entered:

Your Answer**Score****Explanation**

onSharedPreferencesChanged

1.00

Total

1.00 / 1.00

Question 10

In the DataManagementFileInternalMemory application, which method was called to open the file from which the application reads the text to display? Give your answer in the form "ClassName.MethodName".

You entered:**Your Answer****Score****Explanation**

Context.openFileInput

1.00

Total

1.00 / 1.00

Question 11

If your application wants to write to external memory, it should determine whether that external storage is available by calling the Environment.getExternalStorageState() method. What constant value will this method return if external storage is mounted and available for writing?

You entered:**Your Answer****Score****Explanation**

MEDIA_MOUNTED	✓	1.00
Total		1.00 / 1.00

Question 12

The DataManagementSQL example application called the delete(String table, String whereClause, String[] whereArgs) method. This method takes 3 parameters. Which one of the following statements correctly describes the purpose of the 2nd parameter? See <http://developer.android.com/reference/android/database/sqlite/SQLiteDatabase.html> for more documentation.

Your Answer	Score	Explanation
<input checked="" type="radio"/> It helps to determine which rows to extract from the database.	✓ 1.00	
<input type="radio"/> It provides specific values for parameters to an SQL WHERE clause.		
<input type="radio"/> It gives the location of the database.		
<input type="radio"/> It names the specific database table from where to extract data.		
Total	1.00 / 1.00
